

WIRELESS CONFERENCE SYSTEM

WDR69

DESCRIPTION

The WDR69 is a complete wireless conference system.

It consists of a WDR69M receiving station and WDR69C Chairman and WDR69D Delegate transmitters with systematic equalisation function, making it pleasant and easy to use.

USAGE

- Small and medium-sized meetings

FEATURES

- Frequency 600-928 MHz, universal ISM compliant with CCC, CE, ROHS, FCC standards
- Power supply: when the Chairman is switched off, the delegates switch off automatically
- 60 channels (1 chairman and 3 delegates can operate simultaneously). The number of delegates is not limited (FIFO).
- Conference mode: first in, first out and request to speak
- Dual transmission path for base/desk communication
- Battery detection function: an LED lights up when the battery is low
- FM modulation mode: 50K
- Digital frequency shift technology, strong ability to prevent feedback effects, stable and clear tone
- Transmit/receive distance of over 50 m depending on the room
- Jack to jack cable supplied

THE ADVANTAGES

OF DIGITAL TRANSMISSION

- Powerful anti-interference: no interference with mobile phones
- Frequency 600-928 MHz with 60 channels with no limit on the number of delegates
- Low noise, twice as fast as an analogue device, high signal-to-noise ratio
- Improved receiver dynamics
- The device can operate continuously for 12 hours and in standby mode for one week.
