

SOUND SOLUTION

# WORSHIP PLACES

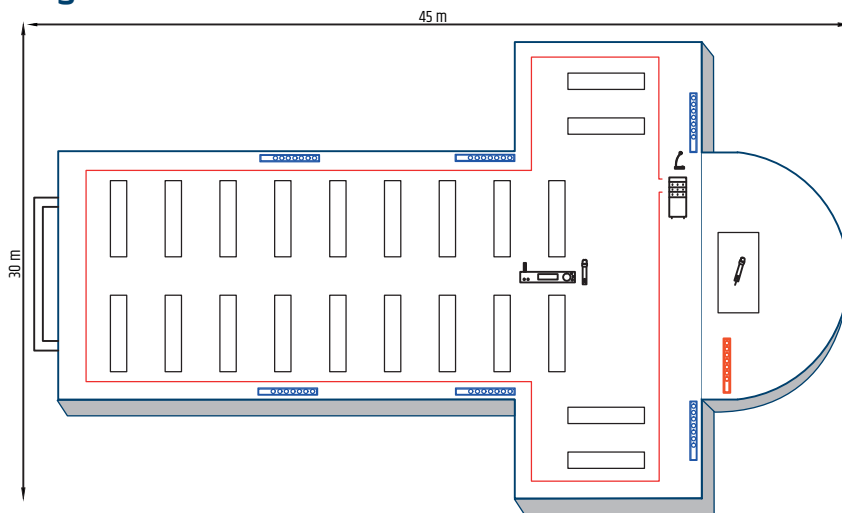

Public address systems in places of worship (churches, temples or mosques) are generally fitted with acoustic columns for optimum diffusion in reverberant environments. The installation of a magnetic loop amplifier offers assistance to hearing-impaired people fitted with hearing aids.

## Schematic diagram

- 2 x 1,5 mm<sup>2</sup> cable: CAHP-1.5-100M
- Microphone cable: CMB02
- Audio cable: CL10

## Layout diagram

### Advantages

- Power rating 250 W
- Coverage area 1000 m<sup>2</sup>
- Magnetic loop for the hearing impaired
- Multimedia player Tuner / USB / Bluetooth
